

As you may be aware the temperature is set to rise in the weeks ahead potentially hitting the 30's! It is therefore essential that we keep our children sun safe. By working together we can make this happen;

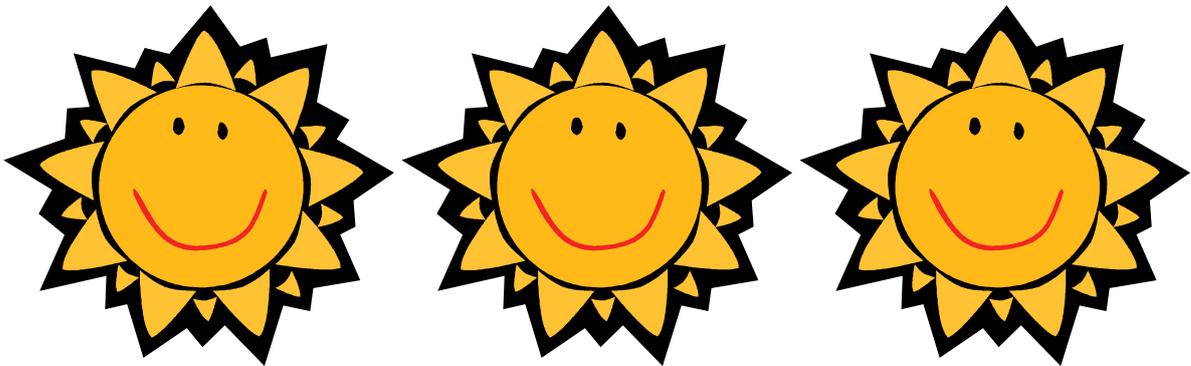

If you

- Apply sun cream in the morning before you arrive at preschool, or when you arrive.
- If your child is at preschool for the full day, provide them with suncream, clearly labelled with their name.
- Provide you child with a sun hat (with their name in)
- Ensure that your child has plenty of drink for the day.
- Cover up arms and backs by t-shirts etc, no strappy tops or dresses please.
- Provide suitable footwear, no flip flops.

We will

- Apply provided suncream after lunch before outside play.
- Ensure hats are worn during outside play
- Ensure children have regular drinks, the drinks trolley will be moved outside to a shady area for easier access.(water is available to top up their bottles)
- Ensure activities are moved to shady areas.

If you have any questions please do not hesitate to ask
